“ The space under elevated highways are often dark, industrial, and empty. With so much capacity to create a vibrant public space, organizations and cities are exploring ways for creative development in the otherwise unused area. — [PopUpCity](#)

UNDERWORLDS STUDIO

CCA + SF Planning

Studio Structure

Phase 1: Mapping the Underworld (+ technical workshops)

Phase 2a: Underworld Activation Proposals (+ projection experiments)

Phase 2b: March 12, 20, 21 - Community Engagement in Dogpatch

Phase 3: Immersive Installation Prototyping (+ event planning)

- April 25 – Pop-up Evening Event @ 20th St & Minnesota St Underpass
- May 4 – Final Review @ CCA

UNDERWORLDS

The image shows the underside of a large concrete highway bridge. The structure is supported by numerous thick, rectangular concrete pillars. The ground beneath the bridge is a mix of dirt, gravel, and some sparse vegetation. In the background, through the openings between the bridge supports, various urban elements are visible, including buildings, a chain-link fence, and some parked vehicles. The overall lighting is somewhat dim, creating a gritty, urban atmosphere. The word 'UNDERWORLDS' is superimposed in the center in a large, bold, white sans-serif font.
